CIE Practice Test IV

Program	Computer Science and Engineering		Semester- III
Course Name	System and Network Administration		Test IV
Course Code	25CS34I	Duration- 180 min	Marks-50
Name of the Course Coordinator: Vinay Kumar			

Questions	CO	Marks
1. You are the network administrator of a small office with 10 computers. A new Windows computer has to be prepared and connected to the office network. Complete the following tasks and document each step in your observation book: a. Create and format a new partition, identify whether the disk is MBR or GPT, and shrink/extend a partition using Disk Management. b. Create a manual restore point, uninstall any program, and roll back the change using System Restore. c. Configure the IP address, subnet mask, gateway and DNS server of the network adapter. Test connectivity using ping and tracert, check open ports and flush the DNS cache. d. Configure the Windows Firewall and the network profile, and share a folder with another system in the network. e. Install a virtual machine (hypervisor) or a third-party VPN app, run basic network commands and note the network usage. f. Document the e-waste disposal procedure for the old computers of the office, and prepare a short lab setup plan covering hardware purchase, electrical safety and cybersecurity. **Scheme of assessment** a) Disk partition work and System Restore - 10 b) Network configuration and troubleshooting commands - 10 c) Firewall, folder sharing and VM/VPN - 15 d) Documentation: e-waste procedure and lab setup plan - 10 e) Portfolio Evaluation - 05 **Total Marks 50**	3, 4, 5	50
